AutoBOOST - Automatic Pump Controller

KSB AutoBOOST is uniquely designed to maintain constant pressure in pipe line by Auto ON / OFF of pumpset. Thus, making the entire system pressure effective and efficient.

Internal electronics system & built in check valve, protect the pump from back flow of water & dry running which boosts the life span of the pump, it is also integrated with manual reset button.

Salient Features

- ▶ Controller unit maintains constant pressure throughout the system
- ▶ Automatic start & stop of pump
- ▶ Protection against dry running
- ▶ Specially designed for confined spaces

Installation Guide

Recommended to use 6" Nipple length in delivery side of pump to avoid the leakage & damage of internal valve.

Technical Specifications

Maximum Working Pressure	10 Bar
Rated Voltage	220 V - 240 V
Frequency	50 Hz
Maximum Current	10 A / 1.5 kW
Starting Pressure Setting	1.2 - 1.5 Bar
Pipe Size	25mm x 25mm
IP rating	IP 65
Cut of Pressure Setting	4 Bar
Maximum Working Temp	60°C

Autoboost should only be used in conjunction with domestic pump
